

Usda Is An Equal Opportunity Employer

**Protect your family's farming legacy,
invest in conservation.**

- Implement filter strips and grass waterways to reduce soil loss
- Utilize nutrient management to reduce excess application
- Minimize tillage to build soil health
- Incorporate cover crops to build organic matter

Join us for the Big Pine Creek Watershed Field Day June 1st to experience live demos of practical conservation application from local farmers, and learn the economic savings behind these practices.

Contact the Benton County Soil and Water Conservation District at (765) 884-0660 for more information
